

pANCA Research – notification of PLE & PLN after project end.

The March 2013 pANCA Research Project Questionnaire is to be the last required by the Royal Veterinary College (RVC) for Wheatens who took part in this Project.

However Dr Allenspach has informed me that she would still like to be informed if a Wheaten is suspected of being affected; or is affected; or has died, of PLE or PLN.

If, upon your dog's death, you are able to consider a Post Mortem, then please contact Dr Allenspach or one of the appropriate specialists at the RVC for information and advice.

Further information go to the [Post Mortem](#) page of our web site.

Thank you
San Jeffries
pANCA Project Co-ordinator

March 2013

Please Note: If you are a fully paid up member of the Soft Coated Wheaten Terrier Club of GB, then application can be made for help towards the cost of a Post Mortem.
